

Yearbook Layout

2014 KSPA STATE CONTEST

Assignment

Your editor has asked you to create a layout about an engineering class project at Sunflower High School. Students in the class designed and built their own non-motorized cars and then completed a lab measuring the speed and velocity of the cars. Using any of the photos provided, design your spread to include a headline treatment, copy, captions and photo placement. There are more photos than you will need, so just select those that work for you.

Entries should be computer generated using your publisher's template (remember to remove your school name from the template before submitting the entry) and may be submitted in color, or in black and white. The final design should be submitted on two 8.5- x 11-inch sheets of paper taped together or on a single 8.5- x 11-inch sheet, reduced to fit the page prior to printing.

Any additional graphics used on the layout (beyond the photos provided by the KSPA) must be the original work of the student. Students may **not** use copyrighted or non-copyrighted art or other graphics taken from the Internet or other non-original sources.

Specifications

- Photos should be cropped and enlarged or reduced to fit the design plan. You do not have to use all photos provided. Both copy and captions should be submitted as dummy text. It may be a single line repeated, gibberish or other placeholder text. Be sure column widths are placed exactly how you want them.
- Headlines (main and secondary, if used) should be real (not dummy text), reflecting the content of the photos/spread topic and should be designed and written in exactly the size, style and location you want.
- Include printer's instructions, if necessary, in the instructions box at the bottom of the template.
- Remember to delete your school's name from the printer's template prior to submitting the entry.
- There are 11 photos. Photos can be downloaded from the KSPA website, State Contest tab, 2014 contest menu.
